Disclosure against Benchmarks

Please disclose whether the Borrower met each of the benchmarks outlined in ASIC's Regulatory Guide 69: Debentures – improving disclosure for retail investors during the quarter. Where the Borrower did not meet a benchmark during the quarter, please explain why that is. Note that these quarterly figures used in this report are unaudited.

1. Benchmark One – Capital Equity

The Company does comply as at 30 September 2017, when the capital equity was 8.6% (from the company's own unaudited records). The company's capital equity has declined slightly, resulting from the impact of increased note issues.

Capital equity is expressed as a financial percentage by dividing the equity capital of the company by the total debt of the company plus equity capital.

The capital equity required is 8% where development loans represent only a minor part (< 10% of investor funds) of the company activities, otherwise 20% capital equity is required.

2. Benchmark Two – Liquidity

The Company complied at 30 September 2017, when the company liquidity was 17.25%. Liquidity is the amount of cash or receivables that the company possesses to ensure that it can readily meet any withdrawal of Secured Note funds or the mortgage operations of the company. As at 30 September 2017 the company held liquidity of \$969,937 which represented 17.25% of Notes (this figure will vary over time). The company maintains a minimum of 10% liquidity and in the event that the company's liquidity nears 10%, the company will stop lending in order to increase its liquidity level. Alternatively the company will seek unsecured loans from its shareholders to ensure that sufficient liquidity is maintained. The experience of the company has been that 10% liquidity is sufficient to cover the ongoing cash needs without relying on any increase in the level of Notes on issue.

The company reviews cash flows on a three-monthly basis and monitors its financial resources (new Note holders, loan payments and loan advances) on a day-to-day basis to ensure compliance with its minimum liquidity policy of 10%.

At 30 September 2017 the company experienced 100 % rollover of maturing Notes for the preceding 3 months. The average monthly rollover of maturing notes for the previous 3 months ending 30 June 2017 was 77%. This figure was distorted by withdrawals during the prospectus No 8 exposure period, after which all except for 4% of those deposits were reinvested. If the company experienced 20% decrease in retention of rollovers it would have sufficient cash levels to meet the projected cash needs.

Because the company has no "at call" as opposed to fixed term funds, cash flow projections are less vulnerable to unexpected fluctuations.

3. Benchmark Three – Rollovers

The company complies with this benchmark as per the Prospectus No.8, dated the 12 July 2017 and at 30 September 2017 as indicated below.

ASIC's benchmark is that Note issuers disclose their approach to rollovers, including whether the 'default' is that Secured Note investments with them are automatically rolled – over upon maturity. The company's policy is that approximately 30 days prior to the maturity date of a 'Fixed Term' investment the company will notify the Secured Note holder in writing, of the rates and terms available upon which funds may be reinvested for a further period. This pre-maturity letter will also state that the company's current prospectus document, together with any related ongoing disclosure documents, will be available from the company's website angleseyinvest.com and that investors who do not have access to the website, may request a hard copy of these documents free of charge by directly contacting the company's registered office.

4. Benchmark Four- Debt maturity

The company complies with this benchmark in Prospectus No.8, dated 12 July 2017 and also at 30 September 2017 as indicated below.

ASIC requires that all issuers should disclose:

- (a) an analysis of the maturity profile of interest-bearing liabilities (including notes on issue) by term and value; and
- (b) the interest rates or average interest rates applicable to their debts.

This benchmark assists investors to understand how the business is funded in terms of the nature, timing and costs of the issuer's debt obligations. At 30 September 2017, the total number of Notes on issue was including issue \$5,622,110 with mean interest rate of 4.8 % and a maturity analysis of:

Term	Amount	Number	Percent
Due before 02/01/18	\$1,068,226	11	19
Due between 03/01/18&02/10/18	\$1,772,798	19	31.5
Due between 3/10/18 and 02/10/22	\$2,781,086	16	49.5
Total	\$5,622,110	46	100

The company reserves the right to redeem early, any Secured Notes by giving 30 days' notice to the holder and redemption may be with or without a premium.

5. Benchmark Five – Loan portfolio

As at 30 September 2017 the Company complied with Prospectus No. 8 dated 12 July 2017.

ASIC require that Secured Notes issuers who on-lend funds, should disclose the current nature of their loan portfolio and their policies in relation to these matters.

Our loan portfolio at 30 September 2017 includes:

- a) The company has 24 loans totalling \$4,211,836

- b) Our mortgage documents provide for our loans to be called up at 30 days' notice. With the exception of one loan term for 5 years, all loans have been written with renewable maturity dates of one year.
- c) The average interest rate charged on loans at 30 September 2017 was 9.45 % and ranged from 8% to 18%.
- d) The number and value of the loans held by class of activity and geographic region:

MORTGAGE LOANS BY PURPOSE AS AT 30 September 2017

Loan Purpose	Loan amounts	No. of loans	Percentage
Rural	\$1,813,401	12	43.1%
Commercial	\$2,398,435	12	56.9 %
Development			
Total	\$4,211,836	24	100%

Security Location	Loan Amounts	No. of Loans	Percentage
NSW	\$2,164,795	15	51.4%
Q LD	\$10,179	1	0.3 %
VIC	\$2,036,862	8	48.3 %
Total	\$4,211,836	24	100%

- (e) As at 30 September 2017 there were two loans in arrears. The total sum of loans more than 30 days in arrears was \$497,676 including arrears interest of \$13,443.
- (f) All loans totalling \$4,211,836 are secured over real property and water licenses and additional personal property security are taken to ensure that the risk of recovering funds is minimised, where it has a higher exposure to single loans that represent such high proportions of the loan book.
- (g) The 10 largest loans total \$2,882,400 which represents 68.4 % of total loans by dollar value and 41.7 % of loans by number.
- (h) No loans are subject of legal proceedings for cost recovery.

6. Benchmark Six – Related party transactions

The company continued to comply on 30 September 2017, as per Prospectus No. 8, dated 12 July 2017.

ASICs benchmark is that Secured Notes issuers who on lend funds should disclose their approach to related party transactions including how many loans they have made to related parties and the value of those loans, and what assessment and approval process they follow with related party loans.

The company has not made any loans to related parties as of 30 September 2017 which is consistent with its current policy of not lending to related parties.

7. Benchmark Seven – Valuations

The company complies with this benchmark as per Prospectus No. 8, dated 12 July 2017.

The ASIC's benchmark is that Secured Notes issuers who lend monies for property related transactions, should take the following approach to valuations:

- (a) Properties (i.e. real estate) should be valued on an 'as is' basis;
- (b) Development properties should be revalued at least every 12 months unless the funds are retained by the issuer and only released in stages to cover project completion costs;
- (c) Issuers should have a clear policy on how often they obtain valuations including how recent a valuation has to be when they make a new loan;
- (d) Issuers should establish a panel of valuers and ensure that no one valuer conducts more than one 3rd of the issuers valuation work; and
- (e) Appointment of valuers should be with the Trustees consent.

Issuers should also include information about the valuation of a particular property in the issuers Prospectus where:

- (a) the property accounts for 5% or more of the total value of property assets of the issuer; or
- (b) a loan secured against the property accounts for 5% or more of the total value of the issuers loan book.

The company has 6 loans at 30 September 2017 that account for 5% or more of the total value of its property assets and these loans collectively total \$2,017,524. The company has sworn valuations of a total of \$5,019,000 for security for these 6 loans as valued by 6 different valuers. These valuations were by summation and direct comparison conducted by independent and qualified valuers on the companies' panel of valuers.

Valuations for loans greater than 5% of total value of property assets of the company

Loan amount	% of Loan Book	Property Value	Date of Valuation
\$345,924	8.2	\$535,000	October 2014
\$289,618	6.8	\$662,000	January 2014
\$250,000	5.9	\$385,000	25 May 2017
\$381,982	9.1	\$575,000	20 Sept 2017
\$500,000	11.9	\$2,500,000	24 May 2017
\$250,000	5.9	\$362,000	22 May 2017

The company reserves the right to obtain on any future dates an up to date valuation of the property or properties offered as security at the borrower's expense. Where loan accounts are conducted with good payment histories, the company relies on periodical enquiries to the original Valuer or agent's appraisal for the relevance of dated valuation. In the alternative with loans that have gone into arrears without agreed arrangements and the valuations are greater than 2 years old, will require a contemporary valuation for determining the asset value.

8. Benchmark Eight – Lending principles – loan-to-valuation ratios

At 30 September 2017, the company continues to comply with Benchmark 8, as per Prospectus No. 8, dated 12 July 2017.

ASIC's benchmark is that Notes issuers who on lend funds in relation to property related activities, should maintain the following loan valuation's;

- (a) Properties (i.e. real estate) should be valued on an 'as is' and (for development property) 'as if complete' basis;
- (b) Development property should be revalued at least every 12 months unless the funds are retained by the issuer and only released in stages to cover project completion costs.
- (c) Issuers should have a clear policy on how often they obtain valuations including how recent a valuation has to be when they make a new loan.

The average loan to value ratio for the company loan book at 30 September 2017 was 40.4% LVR which reflects a conservative lending policy as issuers approach to loan to value ratio is an indicator on how conservative or aggressive its lending practices are.
